5x Growth, 60% Faster Workflows
How reiSource Scaled VDC with Plannerly

From five tools to one platform. A behind-the-scenes look at how a rapidly growing VDC team replaced five disconnected tools, standardized their workflows, and saved 75% of their time using Plannerly.

THE CLIENT

reiSource is a U.S.-based Virtual Design and Construction (VDC) consultancy that supports a range of general contractors, subcontractors, and owners in delivering high-quality, model-based workflows. With a commitment to proactive coordination and consistent delivery, the team leverages cutting-edge technology to reduce rework, improve handovers, and scale digital construction.

THE CHALLENGE

Before Plannerly, reiSource struggled with:
- Disconnected tools creating duplicate work and wasted time
- Inconsistent VDC expectations across teams and projects
- Unclear accountability and version control in documentation
- Reactive workflows that made coordination harder to manage at scale

> **We had different scopes in different formats, some in Word, some in Excel - teams didn't know what was expected, and that led to missed information.**

THE IMPACT

- 60% less time spent on scope tracking and model verification
- 5x growth in team size while maintaining delivery consistency
- Eliminated five separate tools, saving software and training costs
- Increased client confidence through clear, consistent delivery
- Improved onboarding by giving new hires templated processes

THE RESULTS

5x Team Growth
## 60% Higher Operational Efficiency
75% Document Prep Time Savings

THE ACTIONS

reiSource implemented Plannerly across projects to unify scope planning, model verification, and team coordination.
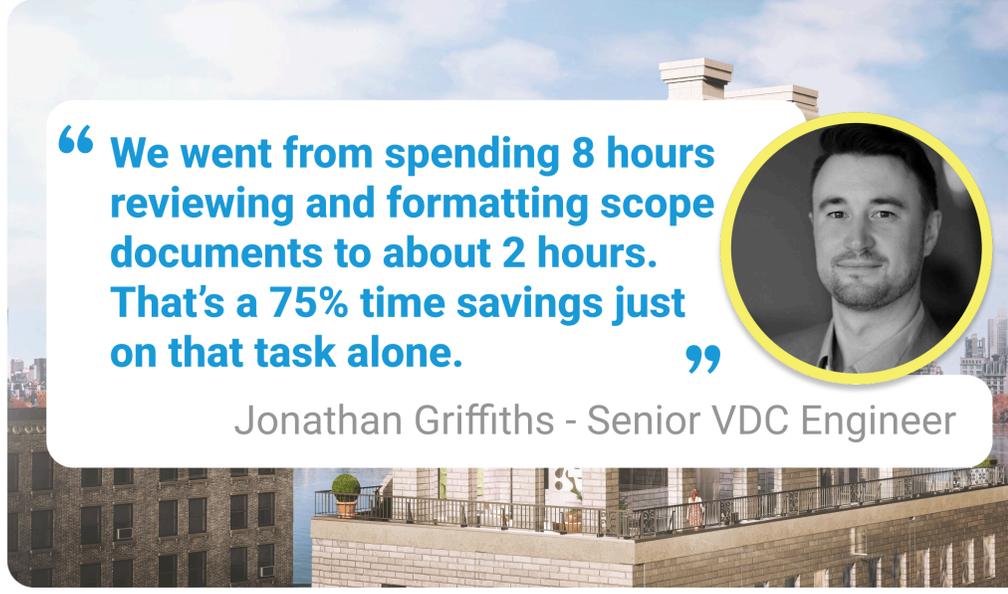

Key initiatives:
- Replaced five tools with one unified workflow
- Built model-linked scope templates
- Automated weekly model checks
- Aligned all internal and external stakeholders
- Streamlined onboarding with repeatable processes

> **We went from spending 8 hours reviewing and formatting scope documents to about 2 hours. That's a 75% time savings just on that task alone.**
>
> Jonathan Griffiths - Senior VDC Engineer

> **What we used to do with five tools, we now do with one - and with more consistency. It's a better experience for our clients.**
>
> Christopher Allen - Senior VDC Engineer

THE ADVICE

"Start small. Try Plannerly on one project. You'll find your team immediately aligns better, and you'll never want to go back. Don't underestimate the power of structure. It gives you freedom to scale."

> **Every hour saved is an hour we can spend doing something valuable—and those savings compound across dozens of projects.**

> **Plannerly cut the time we spent tracking scope and verifying models by 60%.**

> **We're not reinventing the wheel each time. It's scalable and structured. Plannerly gave us a foundation to grow quickly**
